*Farming & Agriculture*

# About Us

Our mission is to blend modern techniques with the unique cultural heritage of farming communities. We believe that agriculture is more than just cultivation—it's a way of life. By honoring traditional wisdom and embracing new technologies, we create a future where farming thrives. Cotta stands as a symbol of growth, culture, and connection to the land we celebrate the roots of agriculture through innovative and sustainable farming practices.

# Major Agricultural Crops

*Cotta cultivates a diverse range of crops that reflect both traditional practices and modern agricultural advancements. Key crops include rice, wheat, and maize, which serve as staple food grains. In addition, Cotta grows pulses like gram, moong, and urad, along with oilseeds such as mustard and groundnut.*

# Farming Techniques and Equipment

- Using tractors, ploughs, and rotavators to till and level the soil, improving aeration and soil structure.
- Seeds are sown manually or with seed drills to ensure proper depth and spacing for healthy crop growth.
- Drip or sprinkler irrigation systems are used efficiently, along with tools for weeding, spraying fertilizers, and pesticides.
- Crops are harvested using combines or sickles, followed by threshing, drying, and storage with modern equipment.
